# Project 1: HTML Descriptive

<b>1. Setup</b>	<b>1</b>
1.1. How to Run The Program	1
1.2. Unit Testing	1
<b>2. Assumptions</b>	<b>1</b>

## 1. Setup

### 1.1. How to Run The Program

- Run the '**HTMLParser**' class in the '**Parser**' folder, then get the input into the terminal.
- The tests are in the '**Test**' folder.

### 1.2. Unit Testing

- In the '**HTMLParserValidatingTest**', these tests will test the sanity of the validation process.
- In the '**GenerateHTMLParserTest**', these tests will compare between the generated output and the expected one to check the generation process correctness.

## 2. Assumptions

- The program terminates when '=' is given as input.
